

caf m explorer

Revamping the CAFM Explorer facilities management product was Darwin's biggest challenge to date. The end result speaks for itself.

FMx have been delivering high quality software products to the Facilities Management market for over 20 years and over this time have established themselves as a market leader in the industry. Their flagship product, **CAFM Explorer**, has been at the forefront of the CAFM industry for almost 10 years.

When FMx decided to develop a new version of the CAFM Explorer product they turned to **Darwin Consultants** to provide the technical expertise they needed to realise their vision of an advanced total FM solution.

Designed and developed in only 10 months, CAFM Explorer remains one of the most advanced CAFM software products on the market. Darwin's underlying framework makes the product fully scalable and easily integrated with other products.

Darwin continue to assist FMx's own development team in maintaining and extending CAFM Explorer and have just helped FMx develop and release CAFM Explorer Quantum, the latest incarnation of this market leading product.
